My journey started in Communication Design, where I learned about storytelling and layout design. Then, I got a Masters degree in Editorial Design, where helped me improve my skills in information architecture and typography across major Portuguese publications.

Decided to transition into the digital field, so I completed 2 courses in WebDesign and UI/UX design to acquire the missing digital skills.

In my last two experiences, I realized how differently UI/UX and front-end teams approach problem-solving and to bridge the gap between those fields, I decided to study Front-End Engineering.

WORK EXPERIENCE

[Shared Services of the Ministry of Portugal](#)

Nov 2023 - Present

UI/UX Engineer

I manage the **Design System** in Figma, designing app and website screens for both **iOS** and **Android**, and translating every design into code using **React.js**, **HTML**, **CSS**, and **JavaScript**. I keep everything visually consistent using components and design tokens, making sure platforms are accessible and meet **WCAG** standards.

I work with functional analysts to evaluate user requirements, aligning business strategy with design decisions among project managers, developers, and UI/UX designers, being the only person to bridge the gap between **UI/UX and development**. I map user journeys and sitemaps to structure interface flows before creating UI mockups and interactive prototypes. I prioritize and apply the **user experience** through:

- **user research** and interviews;
- maintaining visual **consistency** in fonts, colors, and icons;
- providing what's called "emergency exits", like undo actions or go back without the user getting trapped;
- error prevention, making the user focus on one step at a time.

May 2022 - Nov 2023

UI/UX Engineer and Digital Creative Designer

- Developed **social media posts** and **email marketing templates**. This drove follower growth and audience engagement through visuals and storytelling.
- Created **visual concepts** for events, establishing **design guidelines** and strengthening **brand identity** across digital channels.
- Designed **user-friendly interfaces** for the SharePoint intranet and landing pages using **Figma**, turning these designs into fully **responsive** web pages with **HTML** and **CSS**.

Apr 2021 - Feb 2022

Graphic Designer

- Designed and implemented SharePoint intranet solutions to **improve** collaboration and boost team efficiency at Johnson & Johnson in **Figma**.
- Created appealing **product packaging** and **logo** designs for the healthcare industry, making sure a **visual identity** and market appeal.
- Developed **merchandising** designs that attracted audiences, strengthened brand presence, and helped the customer interaction.

[Expresso Newspaper](#)

Sep 2019 - Feb 2020

Editorial Designer

- Designed **interactive** elements to improve the **user experience** for digital newspapers;
- Contributed to attracting a younger audience to the newspaper's digital editions;
- Boosted digital subscriptions by giving ideas and integrating **multimedia features**.
