

Carla Martins

Product Designer | Front-End AI Engineer

carlasofia.myportfolio.com | carla.s.ofia@hotmail.com | linkedin.com/in/carlasofiagm

I began my career in graphic design, which taught me to pay close attention to detail, understand color theory, and communicate stories visually. Transitioning into editorial design strengthened my skills in layout, typography, and content organization—all essential for creating user-friendly interfaces.

I prioritize User-Centered Design and accessibility in every project. Throughout my experience, I've developed a deep understanding of designing with diverse users in mind, especially in environments where accessibility is crucial. This focus has sharpened my skills in both user experience and user interface design, reinforcing my commitment to creating inclusive, intuitive, and user-friendly interfaces that truly address users' needs.

SKILLS

• Accessibility • Figma • Wireframes • Prototypes • Material Design • Bootstrap • CSS
• Desktop • DevOps • HTML5 • Illustrator • Photoshop • Indesign • Miro • Prototypes
• Responsive • Powerpoint • Usability Testing • WordPress

WORK EXPERIENCE

[Shared Services Of The Ministry Of Health Of Portugal](#)

Product Designer

- **User Experience & Interface Optimization:** Designing the UX/UI for the SNS 24 website and app, ensuring coherent experiences across iOS, Android, and desktop platforms.
- **User-Centered Design:** Creating intuitive and accessible designs that enable a good interactions for all users across devices.
- **Collaborative Research and Strategy:** Working closely with functional analysts to gather and evaluate user requirements, aligning design decisions.
- **Visual Storytelling and User Journeys:** Illustrating design concepts through storyboards, process flows, and sitemaps to map user interactions and interface structures.
- **Interactive Prototyping and UI Mockups:** Developing UI mockups and interactive prototypes to demonstrate the functionality and look of the platforms.
- **Design Consistency and Brand Alignment:** Adhering to established style standards for typography, color schemes, and imagery to ensure a cohesive design.
- **Accessibility UX design:** user research, best practices in color contrast, typography, icons, and other UI elements, integrating them into the Design System for consistent inclusive design.
